DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed December 23, 2004 have been acknowledged.
2. The rejection of claims 14-28 and 38-43 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over U.S. Patent Application 10/441,530 is withdrawn due to applicant's submission of the terminal disclaimer.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 14-28 and 38-43 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not provide for the filaments of fibers substantially oriented in at least a first direction substantially continuously along the **entire length** of said building material. Additionally, the specification does not provide for the capstock polymeric material in direct contact with composite reinforcement. Also, the specification does not provide a secondary group of fibers oriented in a second direction.
